

What is the eComStation Demo CD ?

The eComStation Demo CD is a way to demonstrate the look and feel of the eComStation desktop. It will boot directly from CD and cannot be installed onto hard drive, it runs entirely in system memory. Another popular name for this approach is "Live CD" (similar to the Linux Knoppix CD for example). On most hardware, you can take the default settings after selecting boot from eCS CD and your video, audio and network cards will be automatically recognised and drivers loaded from them. If you experience problems – there is an option to customise the drivers being loaded. Help is also available from the eCS-Technical forum at <http://www.yahogroups.com> The advantage is that your current system will remain untouched, the disadvantage is that the memory requirements are quite steep (at least 160 MB of system memory). This demo has printing and writing to the hard disk disabled. The normal version of eComStation can be installed on computers with at least 64 MB of memory. For full details of eComstation including system requirements please refer to <http://www.ecomstation.com>.

Can I hand a copy of this Demo CD out to friends or colleagues ?

Yes, you are allowed to copy and distribute this Demo CD as long as you do not charge money for it, other than a compensation for the cost of duplication. If you wish to use the latest "ISO File" of this Demo CD please register (free) at <http://www.ecomstation.com/democd> this is also the address to refer other people on the Internet to (it is not allowed to distribute the CD over the Internet). If you want to include the Demo CD with a magazine, or otherwise distribute it on large scale, please contact Serenity Systems International, also via <http://www.ecomstation.com>

Will you release a demo version that can be installed on hard drive ?

No, the intention of the Demo CD is not to allow installation on your computer. If you are a corporate user and are seriously interested in evaluating eComStation, you can contact sales and request a full evaluation copy of eComStation.

How can I purchase a copy of eComStation for home use ?

Please refer to <http://www.ecomstation.com> for your nearest reseller. There are packages including applications and support offerings - please refer to the web site for full details
