### Convenience Package Fix Pack XR\_C004 Released

On November 11, 2003 IBM OS/2 Fix Distribution released Fix Pack XR\_C004 for OS/2 Convenience Pack 1 and 2. This Fix Pack can be used with any version of Convenience Package 1 or Convenience Package 2.

Diskette images can be found at [IBM Support and Downloads through Passport Advantage](#).

**NOTE:** These Fix Packs can only be obtained with a valid Passport Advantage subscription. Links to these Fix Packs will ask for your Passport Advantage User ID and Password.

### New DUMP file for LVM systems with LBA enabled drives

On March 4, 2002 IBM OS/2 Fix Distribution released a fix for systems using LVM and have LBA enabled drivers (usually one with greater than 8.3 GB physical size).

This APAR, PJ28457, fixes the problem with os2dump overwriting partitions on LBA-enabled systems. It is suggested that all users apply this fix.

There is a README file with install details in the [DMP0304.ZIP \(click on this link to get fix\)](#) file.

### Special Fix Pack for Convenience Package 2 and Pentium 4 systems with more than 512 MB's of memory

On Feb. 25, 2002 IBM OS/2 Fix Distribution released special set of fixes for Convenience Package 2 and users of Pentium 4 systems with more than 512 MB's.

On some of these systems, you may not either be able to install to, or if already installed to, not be able to have the system boot after adding memory above 512 MB's.

- New systems, not installed to, with more than 512 MB's.

For these systems, you must apply [P4FIX.ZIP](#). Please read the **READ.ME** file in the ZIP for install instructions.

- Systems already installed, and memory above 512 MB's will be added.

On these systems, you must apply XR\_F001 before adding the memory.

It is suggested that all users of Convenience Package 2 apply this Fix Pack.

NOTE : The above fixes are only available via Passport Advantage subscription.
