Re: NVRAM and Delay Line Products
Year 2000 compliance

Dear Customer,

Thank you for your interest with regard to Dallas Semiconductor's Year 2000 (Y2K) product plans.

There are no products in the NVRAMs, Silicon Timed Circuits or RS-232 drivers product lines that have date sensitivity. Therefore, Year 2000 compliance is not an issue with these products.

If you have further questions regarding Year 2000 compliance for these products, please do not hesitate to call or email me.

Sincerely,
Dallas Semiconductor
