

SCSI Multi-Storage Enclosure

Highlights

Scalable growth for your network
Add up to 22.5GB¹ of hot-swap disk storage to PC Server models or to existing Server 95 models.

Flexible storage solution
Mini-tower form factor supports 1.12, 2.25 or 4.51GB disk drives, as well as other SCSI devices.

Fault tolerance for critical environments
With an optional SCSI switch acquired from third-party vendors, you can configure a second PC Server as a "hot spare."

Ample slots and bays
Supports five half-high or slim-high hot-swap disk-drive bays and two additional media slots to keep pace with your growing network storage needs.

PC SystemView (formerly NetFinity)
Allows you to easily and reliably manage your external RAID subsystems through the RAID services of PC SystemView.

Auto drive detection
Automatically detects presence of 8- or 16-bit drives ensuring the correct match when replacing drives.

Additional storage for today and the future

If you're looking for a low-cost, flexible storage solution for your growing PC Server or Server 95 network, IBM has just what you need: the 3517 SCSI Multi-Storage Enclosure. Featuring five hot-swap disk-drive bays and two additional media bays, the Multi-Storage Enclosure gives you as much as 22.5GB of additional hot-swap disk storage for your PC Server or Server 95.

The additional media bays may be filled with more storage drives or tape devices, or you can leave them open for future storage needs. The hot swap-able bays can contain a mix of 1.12GB, 2.25GB or 4.51GB IBM drives.

The SCSI Multi-Storage Enclosure will also support higher-performance disk drives and new drive technology as they become available. So your investment in PC Server products and offerings is protected today and into the future.

Critical backup for your network

If continuous operation of your network is crucial to your business, you'll appreciate the SCSI Multi-Storage Enclosure even more. That's because, in addition to providing expanded storage, it can be a building block in a low-cost fault-tolerant solution. Just connect two PC Servers to the Multi-Storage Enclosure via a third-party SCSI switch. In this configuration, one of the PC Servers functions as a "hot spare" and provides back-up processing in case one PC Server goes down.

The SCSI Multi-Storage Enclosure comes with a limited, two-year warranty² from IBM.

Find out more

For more information on the IBM SCSI Multi-Storage Enclosure or any other part of the IBM PC Server offering, contact your IBM marketing representative or authorized reseller. Or call IBM Direct at 1 800 465-7999.

Optional products:

The IBM SCSI Multi-Storage Enclosure supports the following IBM optional products:

- 1.12GB SCSI-2 F/W Hot-Swap Disk Drive III (70G9861)
- 2.25GB SCSI-2 F/W Hot-Swap Disk Drive III (70G9862)
- 4.51GB SCSI-2 F/W Hot-Swap Disk Drive III (70G9863)
- DAT Tape Drive option kit 4mm-4/10GB (74G8631)
