We'll Give It To You Straight...
A Mid-Range Printer At A Low-End Price—
The Lexmark 4226 Model 302.

If your company falls into one of the following industries, you need a heavy-duty, dot matrix printer like the 4226 to handle continuous multipart forms:

- *Retail—general point of service (such as hotels, rental car agencies, etc.)*
- *State/federal government*
- *Insurance*
- *Healthcare*
- *Banking/Financial Services*
- *Manufacturing*
- *Transportation/Communications/ Utilities*
- *Wholesale*

The Lexmark 4226 Model 302 Printer is built to do one job: heavy-duty, unattended printing of continuous forms. This 9-wire, dot matrix printer has been designed for top speed, dependable feed and the kind of performance you expect from Lexmark.

The Proof is in the Printer
In fact, the 4226 was developed in response to your request for a low-cost, 9-wire printer to handle general data processing and heavy forms printing. You asked—we listened. And we designed the 4226 to meet your specifications:

- You wanted unattended operation you could count on. So the 4226 has a straight paper path that virtually eliminates paper jams. You can leave almost any job—including labels and six-part forms—to run unattended.

- You wanted speed. So the 4226 prints 533 characters per second in FastDraft mode—even when it's handling multipart forms. It also has a 22K print buffer for faster throughput—the printer gets to work quickly, freeing your computer.

- You wanted durability. The 4226 uses proven, dependable 9-wire dot matrix technology and prints up to 12 million characters per month, up to 144 million characters per year.

- You wanted a control panel that really is easy to use—not just for engineers but for operators with limited printer knowledge. We designed one that's so simple to operate you don't have to read a manual to print like a pro.

- Most of all, you wanted the quality of a Lexmark printer at a great value. With the 4226, we're giving you just that—along with a one-year warranty.

Proprinter Compatibility and Epson Emulation
When you told us what you wanted in a heavy-duty 9-wire, near the top of the list was IBM® Proprinter® 4202 compatibility. You wanted it so you could run this printer on your IBM or IBM-compatible systems. And the 4226 comes with Epson® DFX-5000 emulation standard as well. So you can have both Epsons and IBMs in a LAN. Which makes the 4226 an economical way to protect your investment in other peripherals.

The 4226 is designed for workstation, shared printing or system environments. You can attach it to the IBM PS/2, RISC System/6000™, AS/400®, System/370™ (via a parallel or serial interface), and other IBM-compatible systems.

PRINT LEXMARK™

Labels and Continuous Forms Up to Six Parts

Whether you print on continuous single-part forms, six-part forms, or anything in between, the 4226 is ready to run the job. Choose from four resident fonts and six pitches—including proportional spacing. Print on any type of continuous form, from recycled paper to bond letterhead to mailing labels, anywhere from 3 to 16 inches wide and from 12 to 14 inches long.

No Options—No Charge, Either

The 4226 has no options. Because it doesn't need them. (It comes standard with serial and parallel interface—however, the cables are available at an additional cost.)

The 4226 does continuous forms printing. Period. And specializes in printing up to six-part forms—fast, well and at a low cost. It's simply the best in its class—designed for speed, performance and price.

Technical Specifications

4226 Printer
(Model 302)
